Instructions for Poster for F.O.G. Awareness.

One of the big problems for EID is the removal of household waste that has been introduced to the wastewater (sewer) system. These materials can damage the system by clogging pipes and drains and lead to problems for both the consumer and the environment. In order to help alleviate this problem, you are going to develop a poster that will:

1. Educate citizens as to what the acronym represents.
2. Define the problem:
 - a. to their personal property
 - b. to the environment
3. Show how to properly dispose of the materials.

You will be graded on:

1. Overall appearance of the poster
 - a. It must be 11" X 14" in size
 - b. It must be in color
 - c. It must be neat- I don't expect a Da Vinci masterpiece, but I expect it to be representative of a junior/senior level work- lines drawn with rulers, organized, etc.
2. All information must be there.
3. Must be original- if you just print something off of the internet you will receive no credit.
